

## Builder Bulletin 2006 Alberta Building Code Flashing Requirements

Beginning Monday **DECEMBER 1, 2008**, the flashing requirements which have been revised in the 2006 Alberta Building Code will be implemented on all new home construction as well as on additions and major exterior renovations, in Lethbridge.

As explained and demonstrated at the information session held at the demonstration house on September 17, 2008, applications received on or after December 1, 2008 must be accompanied by a flashing detail which shows these changes. Applications which are not accompanied by these details will not be accepted until verification is provided that these flashing requirements will be met.

The Siding Contractors Association of Alberta has prepared an information package and PowerPoint presentation to assist you in this matter. It is available by contacting the CHBA-LR office and can be emailed out to you. If you have any further questions on this new requirement, please contact the Building Safety and Inspection Services Department at the City.

We make the industry...**CONNECT...AWARE...GROW...INNOVATE...SAFE.**

#7, 320 W.T. Hill Blvd. South Lethbridge, AB T1J 4W9
